### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Claims 1-22 are pending in the present application.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "product registration database" [note claim 9 line 1; and claim 15 line 9] must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to because partial views are depicted in figure 2. Note 37 CFR 1.84(p) A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2177

5. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the claim is vague because there does not appear to be a distinction between the preamble and the body of the claim. Also, it is not clear as to how the method is implemented.

Claims 2-8 are rejected based on dependency.

***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 1-8 and 14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claims 1-8 and 14 the disclosed invention is inoperative and therefore lacks utility. The claim does not define a machine or manufacture by identifying the physical structure of the machine or manufacture by way of hardware or software. The claim does not define the implementation of the method as functions or steps to be performed on or by a computer, therefore it is inoperative.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 9-13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Rogers et al. US Patent 5,978,774.

Regarding claims 9-13, Rogers et al. teaches a product registration database containing information on purchased products and return criteria for purchased products, the information processing system storing said information by product serial number according to a serial number mask that characterizes a format of the serial number, wherein the serial number mask includes at least a first character that describes variables of the serial number format ... [note: figure 2 electronic registration (102), prompt for serial number (104) through (112); figure 4; col.5 line 26 through col. 7 line 18].

10. Regarding claim 15, Rogers teaches reducing improper returns of consumer products [note: abstract; col. 15 lines 1-16].

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
